

Agent work, ready for review.

alexapvl/pace-unlayer-build-with-elements · main

READY FOR REVIEW

Build Pace v0

Pace v0 is implemented and verified. One structured run now produces three review surfaces, compact TOON context, and portable evidence artifacts.

01

Objective

Codex · GPT-5 · 594 min

Turn structured agent runs into evidence-backed web, email, and PDF reports that humans can review with confidence.

02

Changes

REVIEW WORKSPACE

Built a three-state review queue with isolated report scrolling and responsive output previews.

src/App.tsx, src/styles.css

REPORT SYSTEM

Created reusable Unlayer Elements reports for web, email, document, plain text, and design JSON.

`src/reports/PaceReport.tsx, src/reports/render.tsx`

AGENT CONTEXT

Added a validated AgentRun schema with lossless TOON and JSON editing and round-trip support.

`src/domain/agent-run.ts, src/lib/toon.ts, src/data/fixtures.ts`

EVIDENCE EXPORT

Added deterministic artifact generation, PDF rendering, and automated verification.

`scripts/render.tsx, scripts/render-pdf.mjs, src/**/*.test.tsx`

✓ PASSED

PDF handoff

manual

Document preview invokes native Save as PDF flow

04

Risk

MEDIUM RISK · Implementation complete. Evidence collected. Human review can begin.

MEDIUM

Agent ingestion remains manual

Pace v0 consumes structured run data but does not connect directly to an agent harness. Mitigation: A strict schema plus editable TOON and JSON keeps integration boundaries explicit and testable.

LOW

PDF saving depends on browser print support

Interactive PDF saving hands the document to the native print dialog. Mitigation: The repository also includes a deterministic headless Chrome PDF export command.

05

Timeline

03:23

Review model established

DONE

Defined run states, evidence structure, and reviewer-focused information hierarchy.

03:27

Elements reports implemented

DONE

Shared content began rendering as web, email, document, text, and design JSON.

03:32

Evidence exports completed

DONE

Added TOON, HTML, design JSON, plain text, and PDF artifact generation.

11:32

Review surfaces polished

DONE

Improved document hierarchy, PDF handoff, navigation order, and scroll behavior.

13:17

Ready for review

DONE

Verification passed and immutable baseline commit was published.

06

Receipts

COMMIT

Baseline a029f46

19 files and 4,506 additions implementing Pace v0
